

Terminal emailers: mutt

Dilawar Singh. & Prashant Dave

Department of Electrical Engineering
Indian Institute of Technology Bombay

February 18, 2012

Outline

- ① How to pop : getmail/fetchmail
- ② msmtplib for sending email
- ③ mutt for reading (like pine)

Please download following files from github repository of Dilawar Singh: <https://github.com/dilawar>

Go to MyPublic, and then to scripts and download:

- muttrc (the main one)
- getmail for each of gpo and ee
- msmtprc (for sending email)
- python file mutt-ldap.py (for using control-t for completing using ldap ids, then to choose)
- ldap (perl script)

We prefer that ubuntu GNU/linux laptops be brought.
(cygwin too is fine, perhaps.)
