How to ask questions? | Describe your problem

ircnewbie: Hello #linuxOS, I installed Fedora-25 on my desktop The installation went well. After reboot I see a message "Kernel panic - not syncing: Fatal Machine check"

How to ask questions? | Give background

ircnewbie: *Hello #linuxOS, I was installing Fedora-25 on my desktop alongside Windows 10. It prompted for select HDD to install MBR(I dont know what that mean). I clicked **sda**. The installation went well. After reboot I see a message "Kernel panic - not syncing: Fatal Machine check". Full logs here: <http://pastebin.com/36794>*

Do your homework

ridip: *hi guys , I have a query*

ridip: *If Swift and Ceilometer are communicating, and if swift ... Would the request from Swift be hanged ?*

psachin: reedip: It should timeout

ridip: *psachin* : this is a behavior which one of our team members noticed in *stable/mitaka*

psachin: *reedip: The request hangs without an error?*

ridip: *psachin* : any idea about the timeout value?

ridip: *psachin: no the request hangs indefinetly, without an error, on the screen. Let me check the logs once though.*
